

**CARE AND/OR MAKE-UP COSMETIC COMPOSITION STRUCTURED  
WITH SILICONE POLYMERS AND ORGANOGELLING AGENTS, IN  
RIGID FORM**

The invention relates to a care and/or make-up cosmetic composition comprising a liquid fatty phase comprising at least one silicone oil, structured with a gelling system comprising

- 10 1) at least one polymer having a weight-average molecular mass ranging from 500 to 500 000, containing at least one moiety comprising:
- at least one polyorganosiloxane group consisting of 1 to 1 000 organosiloxane units in the chain of the moiety or in the form of a graft, and
  - at least two groups capable of establishing hydrogen interactions,
- the polymer being solid at room temperature and soluble
- 20 in the liquid fatty phase at a temperature of 25 to 250°C, and

2) at least one non-polymeric organogelling agent.
